

Hurricane::Exception

```
classDiagram
    class HurricaneWarning["Hurricane::Warning"]
    class HurricaneException["Hurricane::Exception"]
    HurricaneWarning --|> HurricaneException
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled "Hurricane::Warning". A blue arrow points vertically upwards from this box to a white box labeled "Hurricane::Exception" at the top. This indicates that "Hurricane::Warning" inherits from "Hurricane::Exception".

Hurricane::Warning
